#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: at page 5, third-to-last line, "feedback" should be "feedback".

Appropriate correction is required.

### ***Claim Objections***

Claim 1 is objected to because of the following informalities: in line 8, "feedback" should be "feedback". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bausch in view of Rohde and Sano.

The Bausch reference discloses a valve for a steering system comprising a torque motor 16, a ball nut 26, a connection rod 14 with helical grooves, and an electromagnetic brake 30, but remains silent as to what is driven by connection rod 14 or a rotary encoder. However, the Rohde reference discloses a similar valve for a

steering system wherein the ball-nut driven connection rod drives a spool 58 within a sleeve 52 having slots (100, 100a) and a hollow main body having ports (supply 22, exhaust 24, discharge 48) for improved control of the steering system. It would have been obvious to employ a spool within a sleeve having slots and a hollow main body having ports on the Bausch device in view of Rohde (if not already) for improved control of the steering system. Furthermore, the Sano reference discloses a similar valve for a steering system employing a rotary encoder 35 for more accurate measurement of spool position. It would have been obvious to employ a rotary encoder on the Bausch device in view of Sano for more accurate measurement of spool position.

### ***Conclusion***
